Overview

GanzSe Fantasy Low Poly Fishing Props is a stylized low-poly asset pack designed for fantasy and RPG environments.

The pack includes a variety of fishing-related props such as **fish, fishing rods, hooks, floats, baits, crates, buckets, signs, a small boat, and other coastal environment elements** — perfect for harbors, docks, villages, and seaside locations.

All assets are **optimized for mobile, URP/HDRP compatible**, and maintain consistent scale and pivot alignment for easy integration.
